Instructions on How to Setup Multi-Factor Authentication for the VPR-CLS

March 6, 2025

Overview

This document contains detailed instructions for creating an IMS Login Service account, setting up multi-factor authentication (MFA), and logging into the VPR-CLS. Multi-factor Authentication is a multi-step account login process that requires the user to provide two or more verification factors to gain access to a resource such as an application, website, or a VPN. One verification factor is typically your username and password (something you know). The other could be something you have (e.g., a cellphone or key card) or something you are (e.g., fingerprints or some other biometric data to prove who you are). MFA is a core component of a strong identity and access management policy.

For the VPR-CLS, we will be requiring that all users log in with an IMS Login Service username and password. As the second step of authentication, we will be requiring that all users have a cellphone and use the Google Authenticator app to verify who they are.

The following pages contain detailed information on the setup steps involved. Below are the basic setup steps involved:

1. If you do not have an IMS Login Service Account, you must create one. Instructions for this can be found on page 3.
2. You must install Google Authenticator on your cellphone. There are separate setup instructions for Android phones (page 4) and iPhones (page 5).
3. Once you have an IMS Login Service account and Google Authenticator installed on your cellphone, you can go through the MFA setup steps for the VPR-CLS (page 6).
4. Once MFA is set up, you can routinely log into to the VPR-CLS (page 20).

If you have any problems with the setup, please contact IMS at: vprcls@imsweb.com

How to Create an IMS Login Service Account

To create an IMS Login Service Account, please follow the steps below:

1. Apply for an IMS Login Service account. To do so, please use this link:
<https://help.loginservice.imsweb.com/register?fromURL=https://apps.naaccr.org/vpr-cls/>
2. Once you submit your application, you will receive an e-mail (sent to the e-mail address you used in your application) asking you to verify your account.
3. After you have verified your account, please e-mail the VPR Administrators (VPRAdmin@naaccr.org) indicating that you have an active IMS Login Service Account.
4. The administrator will then set up your account permissions for the VPR-CLS.
5. Once established, you will receive an e-mail and be asked to log into the VPR-CLS using the IMS Login Service option and setup your multi-factor authentication: <https://apps.naaccr.org/vpr-cls>

12. Scan the QR code by positioning the red box over the QR code shown on the VPR-CLS website page. An example image of the barcode screen is shown in step 14 (below).
13. Once the QR code is scanned, you should see a 6-digit number displayed in the Google Authenticator app on your phone.
14. On the VPR-CLS login screen, click the NEXT button

15. You should then see a window like the one below. Enter the 6-digit code displayed in your Google Authenticator app under “loginservice.imsweb.com” into the Enter Code box and then click the “Verify” button.

Please note that Google Authenticator will change the number every 30 seconds. You will see a running clock image counting down the time the 6-digit number is good for. If you don't enter it before the clock expires, a new number will appear. If that happens, just use the new number displayed.

The screenshot shows a web interface for setting up Google Authenticator. At the top is the IMS LOGIN SERVICE logo. Below it is a circular icon representing a clock or timer. The text "Setup Google Authenticator" is centered, followed by the instruction "Enter code displayed from the application". There is a text input field labeled "Enter Code". Below the input field is a dark blue button labeled "Verify". At the bottom left, there is a link that says "Back to factor list".

16. Once you enter the number and click “Verify”, you should be logged into the VPR.

Steps to log into the VPR-CLS after MFA has been setup

Once you have your MFA setup, for all future logins to the VPR, please do the following:

1. Go to the VPR-CLS website: <https://apps.naaccr.org/vpr-cls>
2. In the upper right click "You are not logged in"
3. Click "Log In"
4. Click on the "IMS Login Service"
5. Enter your username and password and click Login
6. You will then be prompted to enter a 6-digit code (image below). Open the Google Authenticator app on your cellphone and enter the 6-digit code that is displayed under the "loginservice.imsweb.com" label and click "Verify".

The screenshot shows a web page for the IMS Login Service. At the top is the IMS logo with the text "LOGIN SERVICE" below it. In the center is a circular icon representing a Google Authenticator app. Below the icon, the text "Setup Google Authenticator" is displayed, followed by the instruction "Enter code displayed from the application". There is a text input field labeled "Enter Code". Below the input field is a dark blue button with the text "Verify". At the bottom left of the page is a link that says "Back to factor list".

7. You should then be logged into the VPR!
